DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.
3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the *“projector mounted to the roof inside the motor vehicle”* (Claim 4), *“projection housing being supported in a foldable manner”* (Claim 8) and *“the projector connected to the projection surface so that the projector and the projection surface can be jointly swung out or rolled out”* (Claim 9) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

4. Applicant is required to submit a proposed drawing correction in reply to this Office action. However, formal correction of the noted defect may be deferred until after

the examiner has considered the proposed drawing correction. Failure to timely submit the proposed drawing correction will result in the abandonment of the application.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Chan.

Chan (US Patent Number 5,281,985) discloses a device (16) for projecting image data in a motor vehicle (11) comprising a projection surface (20) secured to a roof inside the vehicle (11); and a projector (16) secured at the rear behind the passengers watching the projection (Figure 6a). The projection surface (20) is mounted to the roof inside the motor vehicle (11) in a foldable or roll-up manner (column 10, lines 31-33). The projector (16) is installed on a rear shelf (column of the vehicle (11)). A loudspeaker device (14) of a multi-media system (18) mounted directly to a housing of the projector (column 8, lines 29-31). The loudspeaker devices (14), together with the projector (16), are integrated in a shared housing (column 9, lines 46-49), further comprising acoustic devices (25). The projection housing is being supported in a foldable manner (column 7, lines 11-12). The projector is connected to the projection surface so that the projector and the projection surface can be jointly swung out or rolled out (column 1, lines 7-13).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Iino (US Patent Number 4,831,366) discloses a projector unit disposed at the ceiling of the automobile vehicle to project display images.

Iino (US Patent Number 4,908,611) teaches a head up display apparatus for automotive vehicle.

Aoki (US Patent Number 5,400,045) shows an indication display unit for a vehicle.

Pietzsch (US Patent Number 5,673,963) discloses a display system with a monitor and display instruments in the seated operator's field of vision. The screen pivots around one axis and tilts around another axis at an angle thereto within the operator's field of vision.
